Changes made. Below is a list of management milestones (including the new one you added this week) that are shown at Rick's Staff Meetings. Please review these and let me know if there is any that you do not want to show up.

Thanks,

Dave

Dave and Mark:

I thought that the 19 day lag time we identified in the SCoR 6 long term schedule was strange. Here's how it should be:

- 6-Month Exposure Data Tables and Figures Available (0d duration) : 5/15/03
- CE Review of Tables and Figures (10d duration) : 5/15/03 - 5/30/03
- Input to Scientific Data Compilation (Clinical) (20 day duration) : 6/2/03 - 6/27/03

The 4/15/03 date was an error on my part. The 10 days that had been added to the "Input to Scientific Data Compilation (Clinical)" task (it was originally 20 days) has been broken out as the separate review task per our discussion this afternoon.

Dave please update the WSA schedule. Please let me know if any questions.

Thanks,  
Valerie
